### **Jobs Report:**

## ***Revised job figures for October released; Preliminary November numbers show strong job growth***

INDIANAPOLIS, Ind. – Today the Indiana Department of Workforce Development released revised October and preliminary November 2004 **payroll employment figures** for the state.

Compiled in conjunction with the U.S. Bureau of Labor Statistics, payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers. The survey is taken each month during the week of the 12<sup>th</sup>.

Looking at revised **October** figures, the state's *seasonally adjusted* numbers indicate that 2,910,100 jobs existed in the month, while there were 2,944,000 total jobs when looking at the revised *non-seasonally adjusted* figures.

In the same report, preliminary data for the month of **November** was also released. The state's preliminary *seasonally adjusted* payroll employment was 2,913,400 jobs for the month. The figure marks a 3,300 net increase of jobs when compared to October and a gain of 17,200 over November 2003. The state's preliminary *non-seasonally adjusted* figure estimated that 2,947,400 jobs existed in November, 4,000 more jobs than existed in October and 16,900 more than existed in November 2003.

At the same time, the nation's preliminary *seasonally adjusted* payroll employment figure grew by 112,000 jobs in November to reach 132.075 million jobs. The country's preliminary *non-seasonally adjusted* payroll employment figure for November totaled 133.162 million jobs, up from October's 132.9 million job mark.

"November's jobs number is another sign that our economy is rebounding. We are seeing jobs being created and businesses investing in virtually every sector of the economy " said Alan Degner, commissioner of the Indiana Department of Workforce Development. "These trends, in addition to the fact that we are seeing more people entering or re-entering the workforce, are positive indicators Indiana's economy continues to pick up steam."

-more-

Seasonally adjusted figures:

In November, Indiana reported 2,913,400 total jobs. The number is up 3,300 jobs from October's (revised) 2,910,700 job number and up a total of 17,200 net jobs when compared to November 2003's 2,896,200 mark.

Looking at November's preliminary seasonally adjusted numbers by **industry super-sector**, Indiana's goods-producing sector reported employment of 729,400 in November, up 7,300 from the previous year. Of that figure, the construction sector saw employment grow by 200 jobs over the month to reach 153,400 jobs, 7,500 more than existed in November 2003. At the same time, the manufacturing sector had 200 fewer jobs in November as compared to October reaching a total of 569,000 jobs, the same figure reported in November 2003.

Indiana's service-providing sector reported employment totaling 2,184,000 in November. This figure is up 3,400 jobs from October revised seasonally adjusted number and up 9,900 when compared to November 2003. Of that, the professional and business service sector grew by 400 jobs from October to November to reach a total of 260,100 jobs, 3,200 more jobs than compared to November 2003. The leisure and hospitality sector gained 1,600 jobs over the month to reach a total of 274,800 positions, 800 more than existed in November 2003. The state's education and health services sector reported 368,100 total jobs for the month, 1,500 more jobs than existed in the sector in October and 6,100 more than existed the same time last year.

(NOTE: ONLY LARGE INDUSTRY 'SUPERSECTORS' CAN BE DESCRIBED IN SEASONALLY ADJUSTED TERMS. FOR MORE SPECIFIC DETAIL ON INDUSTRIES, USE NON-SEASONALLY ADJUSTED NUMBERS)

Non-Seasonally adjusted figures:

In November Indiana's economy gained 4,000 net new jobs over October (revised), to reach an employment level of 2,947,400 for the month. The November preliminary non-seasonally adjusted payroll estimate shows 16,900 more jobs than compared to last year.

Using preliminary non-seasonally adjusted figures to look at the state's **industry sectors**, Indiana's goods-producing sector reported employment of 733,400 in November, down 3,200 from October, but up 7,100 jobs when compared to November 2003. Of that figure, the construction sector saw employment grow by 7,400 jobs from over the year to reach a total of 156,700 positions. The manufacturing sector reported 569,700 jobs in November, a decrease of 800 from October and 100 fewer than existed in November of last year.

Indiana's service-providing sector reported employment totaling 2,214,000 in November, up 7,200 from October and 9,800 jobs when compared to November 2003. Of that, the professional and business service sector grew by 3,200 net jobs over the year to report a total of 262,700 jobs. The state's leisure and hospitality sector reported 273,500 total jobs in November, 2,400 fewer jobs than existed in October, but 700 more than existed in November 2003. The government sector, which includes federal, state and local governments including schools, post offices and hospitals, added 2,800 jobs over the year to reach a total of 439,600 positions in November.

## October Revised and November preliminary payroll employment figures/add 2

Looking at preliminary job numbers in the state's **Metropolitan Statistical Areas** (MSAs), the Bloomington area saw a net gain of 1,100 jobs in November as compared to a year ago to reach an employment level of 73,800. The Elkhart-Goshen MSA's November employment data showed the existence of 121,500 jobs, 500 more positions compared to October and 100 more than existed in November 2003. The Evansville area also saw a net gain of 200 jobs over the month to reach 162,200 for November, 200 net new jobs compared to the same time last year.

At the same time, Fort Wayne's MSA reported 266,600 jobs, 700 more jobs compared to November 2003, while the Gary-Hammond MSA saw employment reach 262,100, 400 more jobs than existed in October, but 1,500 than existed the same time last year. The Indianapolis MSA employment reached 892,000 in November, 1,800 fewer than existed in November 2003 and 100 fewer than existed in October.

The Kokomo's MSA saw 500 new jobs added from October to November to reach a total of 50,600 jobs, 300 more than existed the same time last year. The Lafayette MSA added 1,000 over the year to reach 98,000 total jobs, 100 more jobs than existed in October. Muncie's MSA saw 1,600 fewer jobs over the year, posting 55,200 total jobs for November. The South Bend-Mishawaka MSA added 2,000 new jobs over the year to reach 135,600 total jobs in November, while Terre Haute's MSA gained 600 jobs from November 2003 to reach 70,900 total jobs in for the month.

Through its various programs and initiatives, the Indiana Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with the state's 27 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and, closures and operates a statewide job placement service.

For more information on Indiana's labor market, contact the Indiana Department of Workforce Development at 1-888-WorkOne, or visit the web site at [www.workforce.IN.gov](http://www.workforce.IN.gov).

### Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12<sup>th</sup> of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For most accurate analysis, please use revised data sets and not preliminary estimates

###
